Log-One Ltd. Appoints Peter Mills to its Advisory Board

TORONTO, Oct. 19, 2011 – Log-One Ltd., a leading North American producer of energy efficient thermostats, today announced the appointment of Peter Mills to its Advisory Board, effective August 22, 2011.

“Peter has a strong track record in the building retrofit and energy management space, with significant reach across Canada,” said Glenn Davis, Co-CEO of Log-One Ltd. “As we are developing Log-One to become an OEM it made total sense to learn from his accomplishments and methodology in growing our business successfully.”

Mr. Mills co-founded Stratacon in 1997, the leading provider of submetering solutions in Canada. After successfully building and delivering energy management projects to over 300,000 multi-residential units across Canada, Stratacon was sold to The Consumers’ Waterheater Income Fund in 2008. Mr. Mills currently serves as Managing Director of MultiLogic Energy Solutions Inc., an energy management services company delivering energy savings to the Multi-residential industry across Canada. Prior to entering the private sector, Mr. Mills served, for ten years, in various senior marketing and development roles at Ontario Hydro.

MultiLogic Energy Solutions will be offering the Log-One EMS (Energy Management System) as it is a complimentary solution to the overall energy conservation targets that buildings need to achieve.

“I have been watching Log-One’s progress with keen interest for the last ten years,” said Peter Mills. “I am honored to participate on their Advisory Board and help drive their success. It’s the right solution with ideal market timing.”

About MultiLogic Energy Solutions:

MultiLogic Energy Solutions Inc. is an energy management services company delivering energy savings to the Multi-residential industry across Canada. Specializing in energy efficient lighting solutions, our turnkey services include: government incentive approvals, audits, project installations, permits, and green disposal services. We also deliver a *GreenUp and PowerDown* resident energy education program to reinforce a culture of conservation in the communities we serve. Together with our customers, we’ve eliminated millions of pounds of greenhouse gases. For further information please visit www.multilogicenergy.com.

About Log-One Ltd:

Log-One is a North American developer and manufacturer of intelligent energy efficient thermostats. Log-One helps utility companies, multi-residential apartment property managers and school boards develop unique ways to reduce operating costs through energy conservation. Log-One thermostats deliver 'best-in-class' turn-key solutions for schools and multi-res apartments to enhance comfort and return industry leading energy savings.
